Company Profile

Associates In Research, Inc. is a pharmaceutical research company with a history of conducting medical research here in Central California. It has been in operation since 1996 and has conducted over 200 clinical studies, within a 30 mile radius of Fresno. Fresno is populated with a diverse group of over half a million people and growing. A.I.R. can easily meet the needs of any clinical study. We have access to EKG/ECG machine, ventilator monitor and a pulse oximeter here on site.

Excellent Patient Care and Treatment

Our primary goals is to:

- Efficiently Starting up Studies,
- Rapidly Enrolling Patients
- Executing Studies In Compliance with Protocols
- Delivering Clean, Quality Data

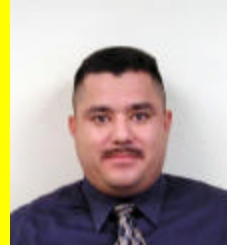

CLINICAL STAFF: Experienced and trained

Associates In Research is built upon a solid foundation of experience in medicine, clinical research and research administration. It is staffed with a Medical Director, a Site Director, and Clinical Research Coordinators. Regina Hamlin, MD is the Medical Director and Armando Torres, Site Director.

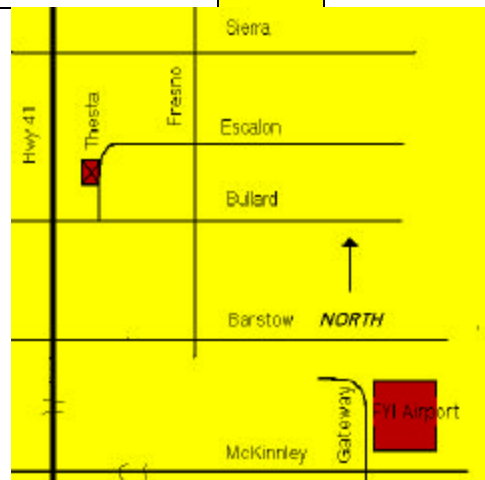

All the clinical staff at the research center are dedicated employees. They are cross functionally trained and provide therapeutic experience to every clinical study. A clinical coordinator is assigned to each study to manage the process and facilitate local physicians who serve as principal and sub investigators. Study coordinators are fully trained and well experienced. Their capabilities are well demonstrated from past studies.

Regina Hamlin, MD
4 years Research experience

Armando Torres
4 years Research experience

From Airport: Make left on Clinton, Right on McKinley Northbound on Freeway 41, Right on Bullard Exit, L-Turn at Fresno-Bullard intersection, then L-Turn on Escalon. Drive until you reach the corner of Escalon and Thesta. We are in the gray building.

Questionnaire

This is a questionnaire to help us better understand what study you would like us to participate in.

What type of study would you like us to conduct?

How many participants would you like us to enroll?
